

## Kansas Customer Water System Service Line Inventory Questionnaire

### City of Ogden

Dear Water Customer:

The Environmental Protection Agency (EPA) recently issued regulations requiring all public water supply (PWS) systems to identify all materials used in the construction of the water service side and the private (customer) service side of the water service line.

We need your help in providing the privately owned (customer side) information by completing and returning the Water System Service Line Inventory Questionnaire. Please take a few minutes to complete this questionnaire to the best of your ability and return it to the address at the end of the questionnaire.

If you are a renter and are not capable of filling out the questionnaire, please return the questionnaire with your address as well as your landlord's name and phone number.

Additional information on the Lead and Copper Rule and identifying lead pipes and plumbing can be found on the KDHE Website at: [kdhe.ks.gov/547](http://kdhe.ks.gov/547) or at the EPA Website at: [epa.gov/dwreginfo/lead-and-copper-rule](http://epa.gov/dwreginfo/lead-and-copper-rule). If you have any questions or desire assistance in completing the questionnaire, please contact the City Offices at 785-539-0311. A member of the public works department can assist you in identifying pipes within your home.

We thank you for your cooperation and participation in this survey.

#### Contact Information

Name of person filling out this questionnaire: \_\_\_\_\_

Property Street Address: \_\_\_\_\_

Phone Number(s): \_\_\_\_\_
